

Make it Yours

Black / interior non-coating, steel Body, ABS plastic, mesh. Support microATX/ATX motherboard. USB3.1, USB2.0, Mic and Audio.

Features

Cooler Master Chassis CMP 250 Cabinet is a new economic model that features superior thermal solution and easy installation.

It comes with superb airflow design that supports up to 4 fans, including one pre-installed 120mm fan in the front. The front bezel of Cooler Master Chassis CMP 250 Cabinet is fully meshed and the PSU placed at the top is aimed to optimize ventilation. Moreover, the side panel with fan mounting points allows users to install two fans to cool the graphics cards.

It supports up to 4 ODDs and 6 HDDS for great expandability. With a good price and cooling solution, Cooler Master Chassis CMP 250 Cabinet is an ideal choice for budget-sensitive users
