SHOWROOM READY.

FEATURES

3 Tempered Glass Panels – The front and side panel offer a clear view of the front fans and system configuration, while the panel behind the motherboard is patterned tempered glass to hide the open side of the PSU.

Addressable RGB Fans – Three pre-installed 120mm addressable RGB fans behind the front panel compliments components for a comprehensive lighting system

ARGB Lighting Control – Sync the lighting on the power button and fans by connecting the ARGB cable from the I/O panel to the included 2 to 3 ARGB splitter. Certified compatible with: ASUS, Gigabyte, MSI, and ASRock motherboards for a comprehensive lighting system.

ARGB Controller Included – Cycle through lighting color and mode with the ARGB controller integrated in the I/O panel if your MB does not support lighting control.

Support for a total of 6 fans & water cooling – Six 120mm fans and front, top and rear water cooling support ensure that you don't have to compromise on performance

Cable Cover & Routing Space – A PSU shroud, cable cover, and 18~25mm width of space behind the motherboard provides options to keep systems clean; GFX cables can also be routed directly through the PSU shroud rubber grommet.

Graphics card support up to 410mm – Ample graphics card clearance provides a high potential for upgradeability

Aggressive Intakes – Large intakes on each side of the front panel feed air to cool the interior

The MasterBox MB530P utilizes the aggressive intakes seen on the MB510L, MB511, and MB520, but employs glass on both of the side panels and the front panel. The application of glass was put in place to support the display of addressable RGB fans included with the chassis.

Three ARGB fans, an ARGB control button, and a system that is compatible with other popular ARGB components mean each component will be presented through the front and side panels with clarity.

The choice in what to display and how clean it looks depends a lot on the covers available. For that, the PSU cover, cable covers, and clean routing space act as a system to manage which components should be displayed and which should stay hidden. There is also a honeycomb pattern on the side panel behind the motherboard; this textured pattern hides the PSU with an aesthetic accent.

SPECIFICATIONS & PACKING INFORMATION

Product Number		MCB-B530P-KHNN-S01		
Product Name		MasterBox MB530P		
Available Color		Black		
Materials		Steel, Plastic, Tempered Glass		
Dimensions (LxWxH)		489 x 229 x 469mm		
Motherboard Support		ATX,Micro-ATX, Mini-ITX		
Expansion Slots		7		
Drive Bays	5.25"	N/A		
	3.5"	2		
	2.5″	4		
I/O Port		USB 3.0 x 2, USB2.0 x2,Audio In / Out, ARGB control button		
ARGB Controller		ARGB Controller included		
ARGB Cable		2 to 3 ARGB Splitter cable included		
Pre- installed Fan(s)	Front	120mm ARGB AB fans x 3(9 blades fan 1200rpm)		
	Rear	120mm Non-Led fan x 1(7 blades fan 1200rpm)		
Fan Support	Front	120mm x 3 / 140mm x 2 (can only mount behind the front plate)		
	Тор	120mm x 2 / 140	120mm x 2 / 140mm x 2	
	Rear	120mm x 1		
Radiator Support	Front	120/140/240/280/360mm		
	Тор	120/240mm		
	Rear	120mm		
Clearances	CPU Cooler	165mm / 6.49"		
	PSU	180mm / 7.08"		
	GFX	410mm / 16.14"		
Cable Routing	Behind M/B Tray space	18~25mm		
Dust Filters		Front, Top , Bottom		
Power Supply Support		Bottom mount, ATX		
Net weight		8.55kg		
Gross weight		9.94kg		
Carton dimension (L x W x H)		560*290*540mm		
Cont. W/ Pallet		Carton/ Pallet	W/O Pallet	
20'	224	28	280	
40′	504	28	576	
40 HQ	576	32	656	

FEATURES

3 Tempered Glass Panels

The front and side panel offer a clear view of the front fans and system configuration, while the panel behind the motherboard is patterned tempered glass to hide the open side of the PSU.

Addressable RGB Fans

Three pre-installed 120mm addressable RGB fans behind the front panel compliments components for a comprehensive lighting system

Support for a total of 6 fans & water cooling

Six 120mm fans and front, top and rear water cooling support ensure that you don't have to compromise on performance

Cable Cover & Routing Space

A PSU shroud, cable cover, and 18~25mm width of space behind the motherboard provide options to keep system configurations clean

Patterned Tempered Glass

The tempered glass panel behind the motherboard is patterned tempered glass to hide the open side of the PSU.

ARGB Lighting Control

Sync the addressable RGB lighting on the power button and fans by connecting the ARGB cable from the I/O panel to the included 2 to 3 ARGB splitter.

SYSTEM BUILDS
